Altschool Student Profile

Name: Adewumi Ajibade

Email address: thelobafunto@gmail.com

Altschool ID: ALT/SOE/024/4705

Biography

My name is Adewumi Ajibade. I am a native of Iloro-Ekiti in Ekiti State, Nigeria, but I was born and raised in Osogbo, Osun State, Nigeria, as the second daughter of three girls.

I completed my primary school education at Faith Nursery and Primary School, Osogbo; proceeded to Osogbo Grammar School for my secondary education, and recently graduated with a degree in Agricultural Economics from Obafemi Awolowo University, Ile-Ife, Osun State.

As a recent graduate awaiting my NYSC call-up from the federal government, I work as a freelance academic writer. I have also recently enrolled in a Cloud Engineering course at AltSchool Africa.

I may not have many hobbies, but I totally enjoy the ones I currently pursue and am open to exploring new ones as time goes on. My present hobbies are swimming, reading, and cooking. I swim at least twice a week and read as many novels as time permits. I enjoy cooking because I like to eat good and healthy meals.

Over the years, I have refined my problem-solving abilities, worked with others on on diverse projects, and cultivated a mindset geared toward continuous learning. My professional and personal experiences have equipped me with the resilience and adaptability needed to thrive in a dynamic environment.

Why I Joined the Program

I joined the program because I aspire to become a cloud engineer. I chose to learn this skill through an organization that offers a comprehensive curriculum rather than attempting to learn independently online without proper guidance. AltSchool's innovative curriculum provides the perfect balance of theoretical knowledge and hands-on experience, preparing students to handle real life problems.

AltSchool also place much emphasis on community-driven collaboration and mentorship which resonates deeply with me. I was inspired by the program's mission to empower aspiring engineers to become world-class professionals, and I can't wait to contribute to and develop within this dynamic ecosystem.

My Goals for the Program

My goals upon completing this program are:

- Master Core Technical Skills: my primary goal is to gain proficient in key programming languages, algorithms, and system design.
- Develop Real-World Projects: Through AltSchool's hands-on learning approach, I plan to work on diverse projects that solve meaningful problems. In addition to improving my technical proficiency, this will assist me in building a portfolio that highlights my abilities.
- Contribute to a Collaborative Environment: I hope to work and relate well with my peers, mentors, and instructors to foster a community of innovation and growth. I would also love to improve my abilities and widen my horizons by sharing knowledge and learning from others.
- Build a Successful Career: My ultimate goal is to graduate from the school as a self-assured, capable engineer prepared to contribute significantly to the tech industry.

This program is not just an academic pursuit for me; it is a stepping stone toward my dream of becoming a transformative force in the world of engineering.
